

CV Martin Hein

Personal Information

Name and surname: Martin Hein

Date of Birth: 23rd of August 1977 (32)

City of Birth: Enschede (The Netherlands)

Nationality: Dutch

Civil state: Single

E-mail: martin.hein@gmail.com

Address: Lipperkerkstraat 518 / 7533 AR Enschede / The Netherlands

Telephone: +31 53 4318898

Mobile: + 31 6 39824876

Education

September 1995 - June 1999: Business Administration - Hogeschool Enschede

The Hogeschool Enschede is a university of applied sciences. The diploma i received from this school is comparable with a Bachelor diploma. Apart from that i also obtained a diploma in Marketing called NIMA-A, which is recognized nationwide in the Netherlands.

September 1989 - June 1995: VWO - Jacobus College Enschede

The VWO is a secondary education which prepares it's students for a study at university level.

Working experience

January 2006 - present: Freelance Webdesigner

Realization of various websites under the name Split-A-Pixel Webdesign

As a completely self taught webdesigner i´ve designed and realized various websites using techniques like Flash, Actionscript, PHP, MySQL, XHTML, CSS and Javascript.

June 2008 - October 2008: Hogeschool Utrecht, Utrecht

Employee of admissions office at school for higher education

Responsible for the (re)inscription of students and supervision of the registration process.

August 2005 - December 2007: Weijers Domino Productions, Woerden

Production coordinator for Domino Day: a world record in dominos (see also epigraph 1)

Coordination of all the information needed to manage this large project. System administration for the company. Coordination and realization of various projects in the Netherlands and abroad (Barcelona, Lissabon, Istanbul, Argentina).

One of these projects was the filming of a commercial for Guinness Beer during which i was responsible for creating a part of the domino effect which you can see in this commercial:

- Making of: <http://www.youtube.com/watch?v=1eiB6C8>

CV Martin Hein

September 2003 - April 2005: Netdirect, Utrecht

Sales assistant / Studio coordinator (see also epigraph 2)

Responsible for the realization of online campaigns for the accounts. Activities included customer contact, reporting and traffic activities. As studio coordinator i was responsible for the technical and visual realization of the material needed for the campaigns.

January 2003 - June 2003: Rabobank Nederland, Utrecht

Employee of accounts payable department at national headquarters

The daily work consisted of receiving payment reminders from creditors and the investigation of the delay of payments by the bank.

January 2002 - November 2002: Weijers Domino Productions, Woerden

Designer of domino projects / Domino coach

Responsible for the design and physical realization of various domino projects. The work included the complete design of domino patterns, design and development of decor objects, making simple technical drawings, developing groundmaps and coaching domino builders in building the domino projects.

January 2000 - August 2001: Media Master, Almelo

Office assistant / Editorial employee / Graphic designer

Media Master is a small publisher of special interest media. While working for this company i was responsible for a wide array of tasks like: writing articles, layout design for magazines, desk top publishing and webdesign.

Internet projects

2009: CustomerCentral / www.customercentral.eu

Gebruikte technieken: Flash CS4 / Actionscript 3 / PHP5 / SQLite / XML

Website in flash for a consultancy company specialized in consumer behaviour. The website integrates a three dimensional tag cloud and is maintained with an in-house developed CMS.

2009: MKDJ / www.mkdj.nl

Techniques used: Flash CS4 / Actionscript 3 / PHP5 / SQLite / XML

Realization of a website in flash for a publicity agency. The website consists out of a combination of animation and actionscript 3.0 and makes use of XML to load its contents from an external application.

2009: Valleyfive / www.valleyfive.nl

Techniques used: Flash MX 2004 / Actionscript 2 / PHP5 / SQLite / XML

Production in flash of a digital portfolio for a graphic designer. The project-data are loaded into the flash movie by using XML. These data can be managed by using a small online maintenance application.

CV Martin Hein

2009: Candelaria Zwiener / Administration software

Techniques used: PHP5 / MySQL / SQLite / Prototype Framework / JavaScript / CSS

Development of a software application for the administration of the product distribution of a clothing company. The system was designed as an online application but in reality is run locally with a portable server, thus creating a network application.

2008: Sleper / www.sleper.nl

Techniques used: XHTML / Flash / JavaScript / CSS

Design and technical realization of a website for a painting company. It's a simple static website integrating various flash elements for navigation and presenting images.

2008: Letranomada / www.letranomada.com

Techniques used: Flash / JavaScript / CSS / XHTML / PHP

Design and development of a website for a new independent publisher from Argentina. The website is based on an open source Content Management System and integrates various custom developed modules among which a simple shopping cart. This last module communicates with DineroMail, an online payment solution in Latin America.

2007: Galerie 10 / www.galerie10.nl

Techniques used: Flash / JavaScript / CSS / XHTML / PHP

Design and technical development of a dynamic website for a gallery in modern art. The art collection of the gallery is maintained and presented by using a CMS (websitebaker) for which various custom modules were developed. In 2009 i also took care of the redesign of the website and added the possibility to present the website in various languages.

2006: Wegloophuis Utrecht / www.wegloophuis-utrecht.nl

Techniques used: HTML / CSS / PHP

Graphic design of the website, development of a website template and technical realization of the website by using an open source content management system.

Web knowledge

XHTML.....	★★★★★	CSS2.....	★★★★★
PHP 5 (OO).....	★★★★★	PHP met XML.....	★★★★★
MySQL.....	★★★★★	Actionscript 3.....	★★★★★
JavaScript.....	★★★★★	AJAX.....	★★★★★
Prototype Framework.....	★★★★★	Jquery.....	★★★★★
Wordpress.....	★★★★★	Drupal.....	★★★★★
Zend Framework.....	★★★★★	Smarty.....	★★★★★

I would characterize myself as a front-end web developer who likes to design and program. For developing web pages and applications i make use of the following software:

Flash, Fireworks, Dreamweaver, NetBeans IDE 6.7, LAMP (local), Notepad++, Corel Draw.

CV Martin Hein

Other

I have a good oral and written expression in Dutch as well as English. Spanish i manage on an intermediate advanced level (B1 of the European Framework). I also speak some German and have some understanding of French. I have a lot of experience in working with automatized systems and possess a natural instinct for analyzing and understanding structures and processes. I don not have a driver's licence but plan on obtaining one any time soon.

Motivation

From november 2008 till august 2009 i have lived in Argentina together with my Argentinian girlfriend. We have the mutual desire to establish ourselves in Europe because Europe can offer us better professional perspectives. As an employee and a person i like to keep developing myself.

I don't like standing still and i am eager to learn. This can vary between discovering and trying new internet techniques to making a nice looking video. I am someone who can both work independent as well as in a team. Within a few years i see myself fullfilling a coordinating role within a web agency or working on a higher level as a webdeveloper.

At this moment i am planning on settling in Belgium, preferrably in the Antwerp region. I am open to job opportunities from other cities or even countries though.

Epigraphs

- 1) *Domino Day is a television program which is organised, produced and broadcasted every year by Endemol The Netherlands. In the program an attempt is made to break the World Record in Domino Toppling. It's broadcasted all over Europe and seen by an audience of almost 100 million spectators. The project takes nine months of preparations. Weijers Domino Productions provides all the domino knowledge needed for the record attempt and is responsible for the productions of the domino-side of the project.*
Website Wijers Domino Productions: www.dominodomain.com
- 2) *Netdirect is one of the bigger players on the market of online advertising in the Netherlands. The company has a large network of affiliate websites in which campaigns can be launched using banners and response pages. All major publishers in the Netherlands make use of the services of Netdirect and it's affiliate websites.*
